VITTORINO PATA

LIST OF PUBLICATIONS

[updated: Marh 2021]

1992

 A. REMUZZI, B.M. BRENNER, V. PATA, G. TEBALDO, R. MARIANO, A. BELLORO & G. REMUZZI, Threedimensional reconstructed glomerular capillary network: blood flow distribution and local filtration, American Journal of Physiology 263 (1992), F562–F572

1993

[2] A. REMUZZI, P. RUGGENENTI, L. MOSCONI, V. PATA, G. VIBERTI & G. REMUZZI, Effect of low-dose Enalapril on glomerular size-selectivity in human diabetic nephropathy, Journal of Nephrology 6 (1993), 36–43

1995

- [3] H. BERCOVICI & V. PATA, Classical versus free domains of attractions, Mathematical Research Letters 2 (1995), 791–795
- [4] V. PATA, Lévy type characterization of stable laws for free random variables, Transactions of the American Mathematical Society 347 (1995), 2457–2472

1996

- [5] H. BERCOVICI & V. PATA, The law of large numbers for free identically distributed random variables, The Annals of Probability 24 (1996), 453–465
- [6] V. PATA, Domains of partial attraction in noncommutative probability, Pacific Journal of Mathematics 176 (1996), 235-248
- [7] V. PATA, The central limit theorem for free additive convolution, Journal of Functional Analysis 140 (1996), 359–380
- [8] V. PATA, A generalized weak law of large numbers for noncommuting random variables, Indiana University Mathematics Journal 45 (1996), 591-601

1997

- [9] F. GAZZOLA & V. PATA, A uniform attractor for a non-autonomous generalized Navier-Stokes equation, Zeitschrift für Analysis und ihre Anwendungen 16 (1997), 435–449
- [10] J.M. LINDSAY & V. PATA, Some weak laws of large numbers in non-commutative probability, Mathematische Zeitschrift 226 (1997), 533–543
- [11] V. PATA, A note on strong convergence of noncommuting random variables, Bollettino della Unione Matematica Italiana B 11 (1997), 141–159
- [12] V. PATA, A remark on the decay of strongly continuous semigroups of bounded linear operators, Rendiconti dell'Istituto Lombardo di Scienze e Lettere A 131 (1997), 143–149

1998

- [13] C. GIORGI, A. MARZOCCHI & V. PATA, Asymptotic behavior of a semilinear problem in heat conduction with memory, Nonlinear Differential Equations and Applications (NoDEA) 5 (1998), 333–354
- [14] M. GRASSELLI & V. PATA, Longtime behavior of a homogenized model in visco-elastodynamics, Discrete and Continuous Dynamical Systems 4 (1998), 339–358
- [15] V. PATA, Sulle soluzioni a crescenza lenta di equazioni differenziali ordinarie (in Italian), Rendiconti dell'Istituto Lombardo di Scienze e Lettere A 132 (1998), 71–83
- [16] V. PATA, G. PROUSE & M.I. VISHIK, Traveling waves of dissipative nonautonomous hyperbolic equations in a strip, Advances in Differential Equations 3 (1998), 249–270
