Silvia Lorenzani Curriculum vitae

Date and place of birth:	23.06.1971, Terni (Italy)
Nationality:	Italian
Languages:	Italian (mother tongue), English, German
Address:	Dipartimento di Matematica, Politecnico di Milano,
	Piazza Leonardo da Vinci 32, 20133 Milano (Italy)
Phone number:	$+39\ 02\ 23994566$
e-mail:	silvia.lorenzani@polimi.it

CURRENT POSITION

December 2017-	Associate Professor, Dipartimento di Matematica,
	Politecnico di Milano (Italy).

RESEARCH INTERESTS

–Non-equilibrium statistical mechanics, kinetic theory
of rarefied gas:
* Analytical solutions of the Boltzmann equation
(variational methods);
* Analytical and numerical investigation of microchannel
flows.
–Microfluidics: Gas rarefaction effects in
Micro-Electro-Mechanical Systems (MEMS) devices.
–Deterministic and stochastic homogenization of
Smoluchowski equation.
–Fluid instabilities.
–Turbulent transition in rapidly rotating flows.
-Turbulent transport of passive tracers.

EDUCATION

July 1990 Classical high school certificate at "Liceo G.C. Tacito" in Terni.

October 1997	Master's degree ('Laurea') in Theoretical Physics, Bologna University, Italy. Final mark: 110/110. Advisor: Prof. G. Turchetti.
	-Thesis title: "A mathematical model for the diffusion in atmosphere of a dense gas" (in Italian).
November 1997 -August 1998	Grant at the Italian National Research Council (CNR) in Bologna. Advisor: Dr. F. Tampieri.
	-Turbulent transport of passive tracers in atmosphere * Investigations of Lagrangian Time-Scales
	 * Closure schemes for Lagrangian Stochastic modelling * Dispersion properties in non-Gaussian turbulence
September 1998 -March 2001	Graduate student researcher at the Department of Physics, University of Bayreuth (Germany). Advisor: Prof. F. Busse.
	 -Hydrodynamical instabilities -Turbulent transition in rapidly rotating flows -Magnetic field generation (dynamo action) -Numerical solutions to the three-dimensional Navier-Stokes equations -Parallel programming
April 2001 -November 2001	Graduate student researcher at the Institute of Geophysics, University of Göttingen (Germany). Advisor: Prof. A. Tilgner.
November 2001	Ph.D. degree, University of Göttingen (Germany).Final mark: magna cum laude. Supervisor:Prof. A. Tilgner. Co-supervisor: Dr. M. Rein.
	-Thesis title: "Fluid instabilities in precessing ellipsoidal shells", concerning the study of precession-driven flows in ellipsoidal containers in connection with the origin of the Earth's magnetic field.
	For the achievement of the Ph.D. degree, the following examinations have been passed:
	 -Fluid Dynamics ('Angewandtde Mechanik und Strömungsphysik') -Numerical methods ('Numerische Methoden') Polativistia guantum fold theory ('Polativistiche
	Quantenfeldtheorie').
December 2001 -March 2008	Postdoctoral researcher, Dipartimento di Matematica, Politecnico di Milano (Italy). Supervisor: Prof. Carlo Cercignani.

May 2008	Assistant Professor ('ricercatore di ruolo'),
-December 2017	Dipartimento di Matematica, Politecnico di Milano (Italy).
July 2013	Master's degree ('Laurea Specialistica') in Mathematics, Bologna University, Italy. Final mark: 110/110 cum laude. Advisor: Prof. B. Franchi. –Thesis title: "Homogenization of the Smoluchowski equation in perforated domains".
December 2013 -December 2019	Achievement of the National Scientific Qualification ('Abilitazione Scientifica Nazionale') as Associate
March 2018 -March 2024	Professor in the sector 01/A4-Mathematical Physics.Achievement of the National Scientific Qualification ('Abilitazione Scientifica Nazionale') as FullProfessor in the sector 01/A4-Mathematical Physics.

MEMBERSHIPS

Since January 2003 Member of the National Group for Mathematical Physics (GNFM-INdAM) Section: Mechanics of continuous fluids.

ORGANIZATION OF CONFERENCES AND SEMINARS

 [1] Conference: "Boltzmann equation: Mathematics, modeling and simulations. In memory of Carlo Cercignani". Institut Henri Poincare', Paris. February 9-11, 2011.

Organizers: F. Bolley, L. Desvillettes, S. Lorenzani, C. Mouhot.

Scientific committee: A. Bobylev, R. Marra, Y. Pomeau, C. Villani.

- [2] Seminar: Luca Marino (Sapienza–University of Rome), "Experimental analysis of rarefied gases in micro-technologies", Dipartimento di matematica, Politecnico di Milano. October 4, 2011.
- [3] Seminar: Marco Lenci (University of Bologna), "Ideas from statistical mechanics for the notion of infinite mixing", Dipartimento di matematica, Politecnico di Milano. April 11, 2014.
- [4] Minisymposium: "Recent kinetic models and their hydrodynamic limits", at the 2016 SIMAI annual meeting (SIMAI 2016), Milan. September 13-16, 2016.

Organizers: Marzia Bisi and Silvia Lorenzani.

- [5] Seminar: Martin Heida (Weierstrass Institute Berlin), "The SQRA operator: convergence behaviour and applications", Dipartimento di matematica, Politecnico di Milano. March 13, 2019.
- [6] Seminar: Kazuo Aoki (University of Kyoto), "Chapman-Enskog theory", Dipartimento di matematica, Politecnico di Milano. November 19, 2019.
- [7] Seminar: Mario Pulvirenti (Sapienza–University of Rome), "Validity of the Boltzmann equation and existence of solutions", Dipartimento di matematica, Politecnico di Milano. November 21-22, 2019.

- [8] Seminar: Giuseppe Toscani (University of Pavia), "Recent socio-economic developments of the kinetic theory", Dipartimento di matematica, Politecnico di Milano. November 29, December 6, 2019.
- [9] Conference: "The legacy of Carlo Cercignani: From kinetic theory to turbulence modeling". Politecnico di Milano, Milan. May 24-28, 2021 (scheduled).
 Organizers: S. Lorenzani, P. Barbante, F. Belgiorno, L. Valdettaro, G. Valente, M. Vianello.

Scientific committee: P. Biscari, A. Frezzotti, G. Frosali, S. Graffi, M. Lampis, G. Magli, R. Monaco, T. Ruggeri, G. Saccomandi, G. Spiga.

VISITING POSITIONS

- Invited by Professor Laurent Desvillettes at the 'Ecole Normale Superieure de Cachan' (ENS Cachan, Paris) during the following periods:
- [*] November 2009, February 2011, October 2011, April 2014.
- Invited by Professor Laurent Desvillettes at the 'Université Paris Diderot' (Paris 7) during the following periods:
- [*] November 2015, March 2017.

RESEARCH PROJECTS (of national interest)

- [1] PRIN 2002-2004 "Mathematical problems of the kinetic theory": Participant.
- [2] PRIN 2004-2006 "Mathematical problems of the kinetic theory": Participant.
- [3] PRIN 2006-2008 "Mathematical problems of classical kinetic theory, complex and turbulent fluids and liquid crystals": Participant.
- [4] CARIPLO 2007-2009 "Innovative models for the study of the behavior of solids and fluids in micro/nano-electromechanical systems": Participant.
- [5] SAES GETTERS S.p.A 2009 "Analysis of the effect of gas composition on the parameters of quality of MEMS": Principal Investigator.
- [6] CARIPLO 2009-2011 "Interactions between surfaces in micro-and nano-devices": Participant.
- [7] PRIN 2009-2011 "Kinetic theory for fluid dynamics and micro-systems": Participant.
- [8] GNFM 2013 "Damping forces exerted by gas mixtures in MEMS devices vibrating at high frequencies according to the kinetic theory of gases": Principal Investigator.
- [9] Annual individual funding of basic research activities (FFABR), MIUR Italy (2017).

REVIEWING ACTIVITIES

Mathematical Reviews, Physics of Fluids, Journal of Fluid Mechanics, Journal of Statistical Physics, Physical Review Fluids, Physical Review E, Journal of Physics A: Mathematical and Theoretical, Physica A: Statistical Mechanics and its Applications, Zeitschrift fuer Angewandte Mathematik und Physik (ZAMP), European Journal of Mechanics-B/Fluids, Microfluidics and Nanofluidics, Computer Methods in Applied Mechanics and Engineering, Vacuum, International Journal for Numerical Methods in Fluids, International Communications in Heat and Mass Transfer, Meccanica, Journal of Fluids Engineering, Journal of Sound and Vibration, Fluids.

- Referee for research projects within the call "Consolidate the Foundations", for basic research activities (Universita' di Roma Tor Vergata), 2016.
- Referee for research projects within a call to provide financial support to non-permanent researchers (RTD) (Universita' di Firenze), 2017.
- Referee for research projects submitted to the SNSF-Swiss National Science Foundation, 2017.
- Referee for the evaluation of PRIN (MIUR, Italy) research projects, 2019.

EDITORIAL ACTIVITIES

2020- Guest Editor: *Fluids*. Special Issue: "Rarefied Gas Dynamics". https://www.mdpi.com/journal/fluids/special_issues/rarefied_gas_dynamics

TEACHING ACTIVITIES

1999-2001	Assistant Professor ('esercitatore') of the undergraduated courses "Quantenmechanik I" (Quantum Mechanics I) and "Methoden der theoretischen Physik I" (Mathematical Methods for Physics), Dept. of Physics, University of Bayreuth (Germany).
2002-2012	Assistant Professor ('esercitatore') of the undergraduated courses "Meccanica razionale" (Theoretical Mechanics), "Meccanica Aerospaziale" (Analytical Mechanics) and "Metodi e Modelli per la Meccanica Statistica" (Statistical Mechanics), Faculty of Engineering, Politecnico di Milano (Italy).
2008-	 Professor of the undergraduated course "Meccanica razionale" (Theoretical Mechanics), Building Engineering/ Architecture (Master of Science degree), Politecnico di Milano (Italy). CFU 6 (33 hours of lectures and 27 hours tutoring).
2012-	Professor of the undergraduated course "Meccanica razionale"(Theoretical Mechanics), Building and Construction Engineering(Bachelor of Science degree), Politecnico di Milano (Italy).CFU 6 (33 hours of lectures and 27 hours tutoring).
2019-	Professor of the undergraduated course "Methods and Models for Statistical Mechanics", Mathematical Engineering (Master of Science degree), Politecnico di Milano (Italy).CFU 8 (80 hours of lectures).
2002-2003	Co-supervisor of the master thesis ('Laurea') in

03 Co-supervisor of the master thesis ('Laurea') in Aerospace Engineering of Mauro Porta. Thesis title:" Numerical simulation of three-dimensional hypersonic flows

	of a fatened gas past complex-geometry bodies
	(in Italian). Faculty of Engineering, Politecnico di Milano (Italy).
July 2013	Supervisor of the reading course ('Laurea triennale') in Mathematical Engineering of Gabriele Rovi. Presentation title:" The Boltzmann equation" (in Italian). School of Industrial and Information Engineering, Politecnico di Milano (Italy).
July 2017	Co-supervisor of the master thesis ('Laurea Magistrale') in Mathematical Engineering of Annagiulia Tiozzo. Thesis title:" Computational models for nanoparticle transport in the vascular system". School of Industrial and Information Engineering, Politecnico di Milano (Italy).
November 2017- December 2020	Ph.D. advisor of Nhu Ngoc Nguyen (INdAM-Marie Curie fellowship). Doctoral program on Mathematical Models and Methods in Engineering, Politecnico di Milano (Italy).
February 2010	 Lecturer within the PhD course: "Micro Electro Mechanical Systems (MEMS)". Titles of the lectures: (*) "Damping in MEMS" (*) "Rarefied lubrication". Department of Structural Engineering, Politecnico di Milano (Italy).
March 2012	 Lecturer within the PhD course: "Micro Electro Mechanical Systems (MEMS)". Title of the lecture: (*) "Microfluidics and rarefied gas dynamics". Department of Structural Engineering, Politecnico di Milano (Italy). (*) Supervisor of the final course project of Alessandro Caspani.
February 2014	 Lecturer within the PhD course: "Micro Electro Mechanical Systems (MEMS)". Title of the lecture: (*) "Microfluidics and rarefied gas dynamics". Department of Structural Engineering, Politecnico di Milano (Italy). (*) Supervisor of the final course projects of Lorenzo Baldrati
	July 2013 July 2017 November 2017- December 2020 February 2010 March 2012

Title of the lecture: (*) "Microfluidics and rarefied gas dynamics in MEMS Department of Structural Engineering, Politecnico di Milano (Italy).	3".
Since 2013 Member of the evaluation committee for the selection of assistants for the MAT/07 (Mathematical Physics) co at the Mathematics Department, Politecnico di Milano	teaching Irses
Since 2013 Member of the Thesis evaluation committee ('Commissi Laurea') for Building Engineering. Politecnico di Mila	one di no.
Since 2016 Member of the committee for the self-assessment (AVA- the Bachelor's degree in Building Engineering. Polited Milano.	MIUR) of nico di
Since 2019 Member of the Thesis evaluation committee ('Commissi Laurea') for Mathematical Engineering. Politecnico di	one di Milano.
16 December 2019Member of the final examination board of the PhD of Ricardo Brancher. Université D'Aix-Marseille (France)	
13 March 2020Member of the final examination board of the PhD of Alexandros Tsimpoukis. University of Thessaly (Greece	e).
27 March 2020 Member of the final examination board of the PhD of Marta Marulli. University of Bologna (Italy).	

INVITED TALKS (WORKSHOPS AND CONFERENCES)

- S. Lorenzani. Rarefied gas flows in MEMS applications. Invited speaker at the Kyoto-Birmingham University International Symposium on "Recent advances in Fluid Mechanics", Birmingham, UK, September 4-5, 2006.
- [2] S. Lorenzani. Gas rarefaction effects in Micro-Electro-Mechanical Systems applications. Invited speaker within the minisymposium "New Trends in Kinetic Theory", at the 2010 SIMAI annual meeting (SIMAI 2010), Cagliari, Italy, June 21-25, 2010.
- [3] S. Lorenzani. On the evaluation of damping in Micro-Electro-Mechanical Systems devices according to the kinetic theory of gases. Invited speaker within the minisymposium "Modelling of vacuum gas dynamics problems", at the ECCOMAS 2012, Vienna, Austria, September 10-14, 2012.
- [4] S. Lorenzani. Analysis of damping forces exerted by single-component gases and mixtures in highfrequency MEMS devices. Invited speaker within the minisymposium "Modelling and analysis of MEMS and NEMS", at the AIMETA 2015, Genova, Italy, September 14-17, 2015.
- [5] S. Lorenzani. High-frequency sound wave propagation in binary gas mixtures flowing through microchannels. Invited speaker at the workshop on "Recent advances in kinetic equations and applications", Parma, Italy, October 1-2, 2015.
- [6] S. Lorenzani. Sound wave propagation in binary gas mixtures flowing through microchannels according to the method of elementary solutions. Invited speaker at the INDAM workshop on "Innovative algorithms and analysis", Rome, Italy, May 17-20, 2016.
- [7] S. Lorenzani. From a microscopic to a macroscopic model for Alzheimer disease: Two-scale homogenization of the Smoluchowski equation in perforated domains. Invited speaker at the workshop on "Mathematical models for quantum and classical mechanics (SEMODAY2016)", Firenze, Italy, November 17-18, 2016.
- [8] S. Lorenzani. Analysis of gas rarefaction effects in Micro-Electro-Mechanical-Systems (MEMS) devices on the basis of the Boltzmann equation. Invited speaker at the workshop on "Advances in Mathematics for Technology (AMATH 2017)", Catania, Italy, October 9-11, 2017.
- [9] S. Lorenzani. Homogenization of the Smoluchowski equation in perforated domains: A mathematical model for aggregation and diffusion of beta-amyloid in Alzheimer's disease. Invited speaker at the workshop on "Asymptotic homogenization in biology", Torino, Italy, June 25, 2018.
- [10] S. Lorenzani. Kinetic theory of gas mixtures. Invited speaker within the special session "Models and numerical methods in kinetic theory", at the 12th American Institute of Mathematical Sciences (AIMS) Conference, Taipei, Taiwan, July 5-9, 2018.
- [11] S. Lorenzani. Variational solutions of the linearized Boltzmann equation for gas flows in microchannels. Invited speaker within the session "Advances in kinetic theory", at the Joint Meeting of UMI-SIMAI-PTM, Wroclaw, Poland, September 17-20, 2018.
- [12] S. Lorenzani. Kinetic modeling of gas mixtures in MEMS applications. Invited speaker within the minisymposium "Kinetic modelling and multiscale simulation of nonequilibrium flow dynamics", at the 9th International Congress on Industrial and Applied Mathematics (ICIAM 2019), Valencia, Spain, July 15-19, 2019.
- [13] S. Lorenzani. Microchannel flow applications of a linearized kinetic Bhatnagar-Gross-Krook-type model for inert gas mixtures with general intermolecular forces. Invited speaker at the workshop on "Theory and Numerics in Kinetic Theory", Parma, Italy, December 13, 2019.

CONTRIBUTIONS TO CONFERENCES AND WORKSHOPS

- R. Cesari, S. Lorenzani, A. Maurizi and F. Tampieri. *Passive tracer fluxes in complex turbulent flows*. In Annales Geophysicae. Nice, France, April 20-24, 1998. XXIII General Assembly of the European Geophysical Society.
